

TRANSPORTATION TUESDAY

CELL PHONE + GAS PUMP A DANGEROUS COMBO !

**Heed Warnings! Some lessons
are best learned without the
experience!**

Cell Phones & Gasoline Do Not Mix !

3 incidents reported at gas stations:

- While pumping fuel a car caught fire from fumes emitted from the tank - a cell phone placed on the trunk of the car rang.
- A man got his face burnt while talking on the phone, when refuelling his car.
- A cell phone burnt a man's trousers - the phone in his pocket rang, while refuelling his car.

Tragic ! Not Funny!!
Don't let it happen to you!

How did it happen ?

The key pad or ringer apparently,
produces a small electric spark

+

=

Enough to ignite petrol/gas fumes!

These incidents could be avoided.

- Keep your cell phone switched off at gas stations.
- If expecting an urgent call and phone cannot be switched off - KEEP IT IN THE CAR - Do not answer a cell phone when fuelling up.
- Reference: HSE Warning from Society of Petroleum Engineers - Dated : 2nd November 2001

**Your cell phone could ignite a
fire!**

Caution !!

As of now, information available
on the subject is insufficient.
It is better to be Safe than Sorry!!

**Mobile Phones & Gasoline
Do Not Mix!**

BETTER BE SAFE THAN SORRY !!

Be Cautious - Be Safe !!
